Test Date

MR. CHO...5 Major U.S. Rivers

Mississippi • Rio Grande • Colorado • Hudson • Ohio

Two Primary
Mountain Ranges
in the United States

Longitude vs Latitude

Imaginary lines placed on a map or globe so we can locate a specific place.

Longitude

- Lines run from North to South
- 0-degrees longitude is the Prime Meridian
- Prime Meridian runs through Greenwich, England.
- Divides the earth into east and west

Latitude

- Lines run from East to West
- 0-degree latitude is the Equator
- Locations located on or close to the equator are very warm.
- Divides the earth into North and South

Compass Rose

Shows cardinal and intermediate directions on a map.
