

GA Habitats and Plant/Animal Features Study Sheet – Chapters 6 and 7

Name: _____

TEST: _____

Be prepared for the test by knowing the following items...

Know the meanings of the following vocabulary words:

*habitat

* environment

*survive

*wetland

* mountain

*migrate

*piedmont

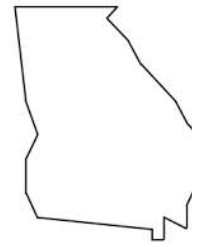

* balance

*reproduce

*hibernate

* adaptation

*trait

Georgia

* How things can change an environment and keep it in balance or out of balance

*Plants/animals found in the five habitats

*Know where the habitats are located in Georgia

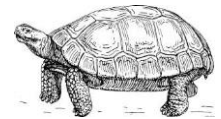

*What happens to plants/animals if their environment changes

*Be able to compare the environments in the different habitats – temperature and precipitation, soil, plants, animals, and land – how do they differ, how are they alike

*Animal and plant adaptations and how they help that plant or animal, including humans

*What happens when an animal hibernates or uses camouflage

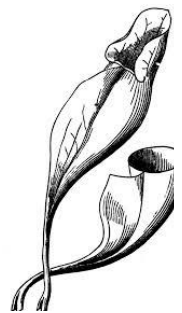

*What plants/animals need to survive

Tortoise
